

Notes on sample class distribution

1. Which class has the least number of samples?

Seborrheic keratosis has the least number of samples at 58

2. Which classes dominate the data in terms proportionate number of samples?

The classes with the most samples are:

- pigmented benign keratosis 370
- melanoma 352
- basal cell carcinoma 309
- nevus 277

Clearly the classes "pigmented benign keratosis" and "melanoma" dominate the data.
